

# MISSED CARE.

Studies show that there are nine elements of regularly missed nursing care: ambulation, turning, delayed or missed feedings, patient teaching, discharge planning, emotional support, hygiene, intake and output documentation, and surveillance – with the most time consuming activities simply being omitted.<sup>1</sup>

If nurses could waste less time gathering supplies and restarting IVs, imagine the positive impact on the overall quality of care, especially for the tiniest patients.

SORBAVIEW SHIELD® NANO

# CENTURION'S SORBAVIEW SHIELD NANO IS A PART OF THE SOLUTION.

SHIELD products are engineered to protect the patient and the site by keeping the catheter and dressing in place for long periods of time. With a built-in stabilization device, SorbaView SHIELD Nano simplifies and standardizes site care for nurses, therefore reducing the rate of complications, patient discomfort and the opportunities for missed care.

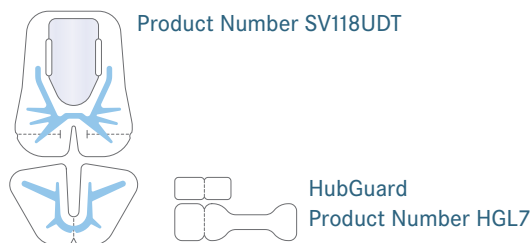

- Minimal surface area eliminates the need to cut dressings down to size and the use of excessive tape
- Nano size specifically designed to fit your tiniest patients
- Nano's versatile design allows it to be used with various types of catheters and extension set configurations
- Built-in stabilization device provides effective catheter securement
- Simplifies normal dressing procedure by incorporating securement into the dressing – no extra steps needed
- Gentle adhesive is latex free and non-sensitizing, making it ideal for delicate skin
- Wear time of 96 hours or until clinically indicated to meet the *INS Standards of Practice* guidelines for peripheral catheters<sup>2</sup>
- Using SorbaView SHIELD establishes a standard of care and eliminates inconsistent methods of securement
- Easy to apply – won't stick to itself during application
- Applying a HubGuard provides a cushion between skin and luer connector
- Available in individual sterile packages or in customized:
  - Neonatal IV Start Kits
  - PICC/Broviac Dressing Change Trays
  - PICC Insertion Trays
  - Umbilical Artery Insertion Bundles

Sized specifically to prevent catheter movement in your tiniest patients

Available in Neonatal IV Start Kits
